Summary of Questions Regarding CNHRPC RFQ for On-Call Engineering Services
09/09/2021

Question 1: Would the selected on-call engineer be providing concepts and costs for some of the projects off the Potential Projects lists or would it be entirely new projects not yet identified?

It is likely that the selected on-call engineer would assist with conceptual plans and estimates for Potential Projects Identified in the CNHRPC Regional Transportation Plan Corridor Spotlights as well as entirely new projects not yet identified.

Question 2: How does the region select projects for the Potential Projects list?

The Summary of Potential Projects in the CNHRPC Regional Transportation Plan Corridor Spotlights were identified based on information from previous planning studies and local Master Plans.

Question 3: The SOQ requirements do not ask for a work sample, but the evaluation criteria indicate that our team will be evaluated on the quality of our work samples. Are work samples required, and if so, how many?

The RFQ notes that Statements of Qualifications must include "A brief description of the three most current related projects with an outline of the level of involvement." Those project examples will be used as part of the scoring process.
