Canterbury, NH 03224

This study was prepared by Central NH Regional Planning Commission (CNHRPC) for the Town of Loudon. The purpose of the study was to consider local traffic impacts caused by the NASCAR Race held at the New Hampshire Motor Speedway. Traffic counters were setup at 10 locations - 8 of which were in Loudon and 2 in Canterbury. The counters were setup on Monday 9/8/2025 and retrieved on Tuesday 9/23/2025. This collection period allows for the comparison of baseline traffic volumes prior to the race (Tue 9/9 through Mon 9/15) to race week volumes (Tue 9/16 through Mon 9/22 with the race happening on Sun 9/21). The report considers hourly volumes, weeklong averages (Tue-Mon), weekend averages (Fri-Sun), and peak volumes.
